DETAILED ACTION

1. The information disclosure statement (IDS) submitted on 10/30/2001 has been considered and placed in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Ogawa et al. (5,976,146). Ogawa et al. disclose a surgical operation system including dilator and dilator retractor having oval or elliptical cross section (figs. 74A-74C, col. 35, line 60 to col. 36, line 9) and other features of dilator and dilator retractor as claimed are disclosed through out the Ogawa et al. reference.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3 and 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ogawa et al. '146. Ogawa et al. disclose all the limitations of the claims except fail

Art Unit: 3731

to disclose a series of dilators and dilator retractors with different sizes. It is known in the art to make series of surgical tools in different sizes in order to provide a best fit for a patient during a surgery procedure. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make a series of Ogawa et al.'s dilators and dilator retractors in many different sizes in order to provide a best fit for a patient during a surgery procedure.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. O'Neill (5,954,671).
